Contractor Request

Request Submitted By: James Merrill 08/18/2025

Request:	There is existing underground electrical feeding Protocol D, and Panels LJ, LK, and LL in the rear hallway between the existing deli cooler and produce prep. These existing conditions currently prohibit the installation of two rear new 16' x 16' footings between the existing store and expansion areas.
Suggestion:	Please advise.

Response

Response By: Matt Andrus 09/24/2025

Response:	It is our understanding that the existing underground electrical is able to remain existing in place during the installation of the two new column foundations.
